

S45SP-GY-6A

RJ45 connector boots are available in two designs: snag-proof (featuring a protective section that covers the connector's plastic latch) and non-snag-proof (without this protection). Both types of these solid boots (i.e., the boot must be slid onto the cable before crimping the connector) are supplied in all standard colors, namely gray, red, blue, yellow, green, white, and black. The boots are characterized by a long life and durability; they effectively protect the connector from potential damage and reduce bending strain on the cable. The boots are suitable for various cable diameters ranging from 5.0 to 5.5 mm, and up to 8 mm in the case of the S45SP-GY-6A model. All Solarix boots are packaged in packs of 100 pieces.
